Messages of Congratulations

“On behalf of the New Zealand government and the people of New Zealand, I would like to extend my sincere congratulations to this year’s Fulbright grantees, their teachers and their families.

For more than six decades, the Fulbright exchange programme has seen thousands of young New Zealanders and Americans study in each other’s country. New Zealand and the United States have a close and vibrant relationship, and the strong links between the people of our two countries, particularly those established and fostered through the Fulbright programme, are an essential part of that relationship. I have no doubt your experiences will lead to greater collaboration and cooperation between our countries across a broad range of disciplines. I wish you all the best for your exchanges.”

Hon Murray McCully
Minister of Foreign Affairs, New Zealand
Honorary Chairperson, Fulbright New Zealand

“Congratulations to all of this year’s Kiwi and American Fulbright grantees. The Fulbright program is the flagship of American academic exchanges, and your participation is a testament to your excellence, imagination, and dedication.

This year marks the 70th anniversary of formal US-NZ bilateral relations, as well as the 174th year of American diplomatic presence in Aotearoa. The more than 2,700 Fulbrighters who have traveled between our two countries have contributed greatly to the strength, depth, and breadth of this historic, enduring relationship. Senator Fulbright’s vision was founded on knowledge, reason, compassion, and friendship. Those keystones – if preserved and strengthened against tides of unleavened mercantilism – will serve successive generations extremely well as they step forward to lead our two countries.”

Hon David Huebner
US Ambassador to New Zealand
Honorary Chairperson, Fulbright New Zealand

“On behalf of Fulbright New Zealand’s Board of Directors and staff, congratulations to all of this year’s Fulbright grantees. You are now part of a long and esteemed tradition of educational and cultural exchange between the US and New Zealand. We encourage each of you to make the very best of your exchange opportunity, and to remain engaged long term as Fulbright alumni who are committed to improving their country and the world.

We are proud to make such a meaningful contribution to the academic, professional and cultural capital of our two partner nations. My own Fulbright experience really was a turning point in my career and personal life, so I encourage all grantees to embrace every opportunity their award presents.”

The Fulbright Programme

The Fulbright programme of international educational exchange was an initiative of American Senator J. William Fulbright from Arkansas, who in the aftermath of World War II believed that mutual understanding between different countries and cultures was crucial to ensure a peaceful future for the world.

The Fulbright Act, an ingenious piece of legislation passed by the United States Congress in 1946, directed proceeds from the sale of surplus war property, foreign loan repayments and reparations to fund the “promotion of international good will through the exchange of students in the fields of education, culture, and science.”

In Senator Fulbright’s own words, the Fulbright programme aims “to bring a little more knowledge, a little more reason and a little more compassion into world affairs and thereby to increase the chance that nations will learn at last to live in peace and friendship.”

New Zealand was the fifth country to sign up to the Fulbright programme by bilateral treaty with the United States of America, in 1948. Since then Fulbright New Zealand has sent more than 1,500 New Zealand graduate students, academics, artists and professionals to the US and welcomed more than 1,200 Americans on exchanges here.

Fulbright New Zealand is jointly funded by the US and New Zealand governments with additional funding from award sponsors, private philanthropists and alumni donors. It is governed by a twelve member Board of Directors comprised of six New Zealanders and six Americans.

The Fulbright programme has been described as one of the largest and most significant movements of scholars across the face of the earth and now operates in over 155 countries, funding around 8,000 exchanges per year for participants to study, research, teach or present their work in another country.

The more than 300,000 Fulbright alumni worldwide include heads of state, cabinet ministers, ambassadors, politicians, judges, heads of corporations, university presidents, journalists, artists, professors and teachers.

Esteemed alumni of the Fulbright programme include Alan MacDiarmid, Dame Marie Clay, Sir Wallace Rowling, Allen Curnow, Dame Jean Herbison, Sir Kenneth Keith, C. K. Stead, Bill Manhire, James Belich, Michael King, Witi Ihimaera, David Cunliffe and many other significant New Zealanders.

Fulbright grantees make the most of their exchanges to get to know and understand a different country and culture, to advance themselves academically or professionally and to make lifelong friendships and professional relationships. Many look back on their Fulbright exchange as a life-changing experience and a defining moment of their career.
